Re: Safety

It is not often that I can write a letter to a company for their safety efforts. This is one of the times in my nearly forty years in the safety field that I can.

From the first meeting with Carl and yourself I had the impression that your employees were your most important asset. That impression proved to be true. In every safety suggestion or audit result your response was "let's make it happen". There are very few companies that have the safety attitude that Alure has.

This attitude translates into a non-existent accident/injury profile. The number of accidents/injuries are so low they are not worth mentioning. Your employees know that your open door policy for their safety concerns are always followed up with an answer on how to correct these concerns.

In closing I would like to say what a pleasure it has been working with you and Carl in our pursuit of safety excellence.

Yours in safety;

Damien Steen
President
