Remodel Your Bathroom, Rejuvenate Your Life

Remodeling your bathroom can significantly enhance both your home and quality of life. While this may seem like a bold statement, there's a reason why bathrooms are a top room to renovate (second only to kitchens).

You spend a lot of time in the bathroom, so the space should be as comfortable, convenient and functional as possible – especially the tub or shower. Being the focal point of the room, even minor upgrades and improvements can have a major impact on its appearance.

From converting an outdated tub to installing a new spa-like shower, there are plenty of ways to give your bath a makeover. It's important to consider which changes will most benefit the lifestyle needs of your family.

This eBook will explore the benefits of each option.

*Remodeling your
bathroom can significantly
enhance both your home
and quality of life.*

Considering a Shower Conversion?

There are myriad of reasons people decide to convert a tub into a shower, including maximizing bathroom space, making entry/exit easier and modernizing the appearance. Regardless of your motivation, shower conversions are practical, cost-effective and can immediately make the room more appealing. Plus, it's a quick project that can be completed in just two days.

You'll have a variety of design and style options to choose from, including:

- **Frame or frameless doors.**
- **Seat styles.**
- **Barrier or barrier-free.**
- **Recessed or flush mount soap dishes.**

You can also incorporate a number of accessories. For example, corner caddies and single and corner shelves can help keep the shower organized. If safety or slipping is of particular concern, you may want to consider installing grab bars.

Converting your tub into a shower is quick project that can be completed in just two days.

Bathtub Replacement Options

If you love your bathtub but just need to update the appearance, consider a Bathwraps system. New Bathwraps products can be custom measured and manufactured to fit right over the existing unit – and can be completed in just one day.

The wall liners come in a wide range of colors and style variations - allowing you to customize and tailor the product to suit your aesthetic and functional needs including:

- **Solid colors.**
- **Simulated tile.**
- **Premium granites.**

There are also options to add a shower niche, new fixtures and grab bars.

What About a Walk-In Tub?

If you aren't ready to say goodbye to your bathtub experience, but are having issues getting in and out of your tub, consider a walk-in tub as a safer solution.

According to the Centers for Disease Control and Prevention, falls are a leading cause of injury among seniors, with many happening in or near the tub. Walk-in tubs make your bathroom safer. In addition to safety controls and slip-resistant flooring, the benefits of walk-in tubs include:

- **Low threshold for easy entry and exit.**
- **Inward or outward swinging doors.**
- **Simple installation process.**
- **Seats' height compliant with the Americans with Disabilities Act.**
- **Available in soaker, air space, Whirlpool or a combination.**

Walk-in tubs can even improve your health by increasing circulation, relieving aches and reducing stress.

According to the Centers for Disease Control and Prevention, falls are a leading cause of injury among seniors, with many happening in or near the tub.

Bathwraps Design and Style Options

Making the decision to do a Bathwraps system is an easy one. What might be more difficult is choosing between all the different design and style options. But the variety you have makes it easy to find the product that suits your specific needs – whether you’re looking to match it to your bathroom’s current aesthetic or opt for a complete makeover.

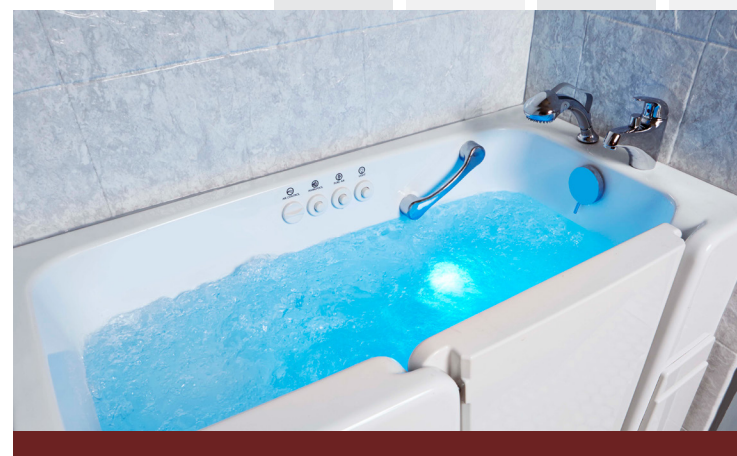

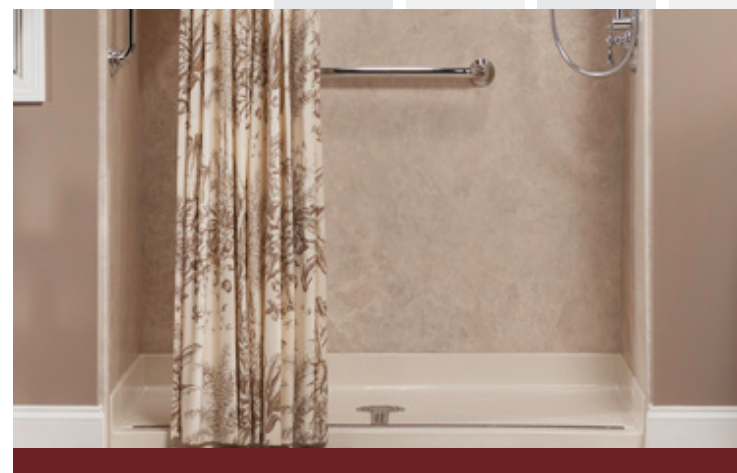

Bathwraps tubs come in four solid base colors:

- **Alabaster white.**
- **Quarry topaz.**
- **Sandshell beige.**
- **Platinum gray.**

Another design element you will have to decide on is the wall color, which is available in cirrus, sierra or Moroccan marble, pebble granite or a variety of simulated tile options.

Simulated tiles are offered in a number of variations, including:

- **Subway.**
- **Stone.**
- **Sculpted.**
- **Random stone.**

Why Choose a Bathwraps System?

Your satisfaction with your bath remodel hinges on the types of products you use. You want Bathwraps products that are high quality, durable and come with a lifetime guarantee.

These products should be 100 percent acrylic, which offers a handful of advantages. Acrylic is a great option in the bathroom because it retains heat longer. It features an antimicrobial technology that prevents mold and mildew growth. Also, it is a non-porous, scratch resistant and maintenance-free material that won't crack, chip or peel.

Finally, installing our Bathwraps systems will be quick and painless, as they are custom measured and manufactured to fit perfectly over your existing shower or tub and can be installed in just one or two days.

Bathwraps products are high quality, durable and come with a lifetime guarantee.

Getting Started

Strong arguments can be made for why you should convert your tub into a shower – and vice versa. It all comes down to your personal needs and preferences. With either, it's important to choose quality products and reliable contractors.

Find a full service home remodeling company that specializes in bathroom remodeling. You want an expert designer that can help with every aspect of your bathroom renovation from the initial consultation and design to installation and service.
